Model: KIP 71 G Series

RE: System K Version 3.1

Date: June 1, 2023

**ACTION
REQUIRED**

For Reference 

Production Change

Order as Required

KIP System K Software is enhanced to include the controller's operating system (OS). The updated version OS is preferred by IT professionals and is included with all new KIP 71 G Series.

SysK 3.1 Highlights (from SysK 2.4)

- New Home Screen layout & default color scheme
- Update the controller OS for future system security & OS enhancements (Windows Enterprise 21H2 LTSC)
- Improved Host Name resolution
- Utilizes .NET 4.8
- Updated controls for cloud drive authentication
- JQuery updated to v3.6.0
- New default PDF screening, for modern PDF files
- QR Code as a static Home Screen Tile for core user functions. KIP Authorized Dealers can also replace or add their own QR code to the home screen for their own functions. Please contact KIP Software Support Service for the instructions to add your QR code.
