RE:	Product Enhancement - 15.6" Touch Screen
Date:	November 1, 2023

**ACTION  
REQUIRED**

For Reference

Production Change ☒

Order as Required

The KIP 71 G Series has a product enhancement, with the touch screen increasing from 12.1" (4:3) to 15.6" (16:9). This change will commence from serial number 13420386.

With the larger touchscreen, the user experience is enhanced to include:

- improved & simplified access to the system's many functions, as there is less scrolling with more of the features on a single screen.
- smoother text and graphics (icons) with the increase in screen resolution
- superior, more vibrant screen colors

The various manuals referring to the enhancement are posted on the kip.com website to include:

- Setup Procedures (from Version A.1)
- Parts Manual (from Version 1.1)
- Service Manual (from Version A.1)
- User Manual (from Version A.1)

12.1" (4:3)

15.6" (16:9)
