	Order as Required	

The K134 chassis has been enhanced to include the items below and is now branded the KIP 71 G Series. The KIP 71 G Series serial numbers start from 1342xxxx.

1) **Quicker Touch Screen Responses**
   The controller uses a Solid State Drive (SSD) as the default fixed disk to improve user touch responses and file processing.

2) **System Software**
   KIP System K Version 3.1 with Windows IoT LTSC as the OS is the version of System K software.

3) **Covers/Panels**
   As like other G series models, the KIP 71 G Series has "Brushed Steel" trim.

Technical Certification / Education
Technicians with an Authorized KIP Dealer who are certified by KIP for installation & service on the 7170K or the 71 Series (with System K Software) are automatically certified on the new KIP 71 G Series.

KIP also offers in-class education to include the 71G Series & 75 G Series in the five-day workshop. Please refer to the KIP website for locations and dates: https://www.kip.com/training-technical.php

All technical materials are posted on the KIP website. When installing and servicing any version of the K134, ensure you are using the correct version of Technical Documentation to include Setup Guides, Service Manual, Parts Manuals and Schematics.
